Break my heart – Dua Lipa

```
Mim                          Sol                Do
 I've always been the one to say the first goodbye
                                          Mim
Had to love and lose a hundred million times
                        Sol              Do7+
Had to get it wrong to know just what I like
        Sim7   Mim
Now I'm fallin'
                             Sol           Do7+
You say my name like I have never heard before
                                           Mim
I'm indecisive but this time I know for sure
                         Sol                Do7+
I hope I'm not the only one that feels it all

Are you fallin'?

Center of attention
         Re                          Sim
You know you can get whatever you want from me
              Mim          Re
Whenever you want it, baby
     Do7+
It's you in my reflection
         Re                                  Si
Now I'm afraid of all the things you could do to me

If I would've known it, baby

           Mim
I would've stayed at home, 'cause I was doin' better alone
             Do                 Sim                            Mim
But when you said, "Hello", I knew that was the end of it all
            Mim
I should've stayed at home,

'cause now there ain't no letting you go
     Do7+                       Si7            Re       Mim
Am I falling in love with the one that could break my heart?

Oh no, I was doin' better alone
             Do
But when you said, "Hello",
  Sim                          Mim
I knew that was the end of it all

I should've stayed at home,

'cause now there ain't no letting you go
     Do7+                       Si7            Re       Mim
Am I falling in love with the one that could break my heart?

Mim                        Sol6            Do7+
 I wonder when you go, if I stay on your mind
                                                 Mim
Two could play that game, but you win me every time
                      Sol6            Do7+
Everyone before you was a waste of time

Yeah, you got me

         Re                            Sim
